Response to contributors March 15th 2015
Early registration April 11th 2015

CALL FOR ABSTRACTS

Main Topics

- 1 Recent Advances in Time-to-Event Models
- 2 Risk Prediction Models
- 3 Growth-Curves
- 4 Analysis of Registries and Administrative Databases
- 5 Clinical Trials
- 6 Early Phase Studies
- 7 Flexible and Adaptive Designs
- 8 Mixed Models
- 9 Missing Data Analysis
- 10 Personalized Health Care - Biomarkers into Clinics
- 11 Methods and Applications in Genetics
- 12 Methods and Applications in Omics
- 13 Survival Analysis
- 14 Recent Advances in Public Health Care Analysis
- 15 Statistical Methods in Infectious Disease
- 16 Methods in Epidemiology
- 17 Nutritional Epidemiology
- 18 Studies in Veterinary, Agricultural and Environmental Research
- 19 Other Topics related to Biometrics

COURSES

Full-day courses:

- **Temporal and spatio-temporal modelling and monitoring of infectious diseases**
Michael Höhle, Department of Mathematics, Stockholm University, Sweden
Sebastian Meyer, Epidemiology, Biostatistics and Prevention Institute, University of Zurich, Switzerland
- **Analyzing latent times and competing risks in survival data**
Laura Antolini, Paola Rebora, Maria Grazia Valsecchi, Department of Health Sciences, University of Milano-Bicocca, Italy

Half-day course:

- **RNA-Seq: From analysis workflows to high-dimensional modeling**
Harald Binder, Division of Biostatistics, University Medical Center of the Johannes Gutenberg University Mainz, Germany

INVITED SESSIONS - organizers

- Does size really not matter? Evaluation of treatment effects in subgroups and other small populations
 Martin Posch and Franz König
- Statistical methods for omics data integration - Clelia Di Serio and Michael Schimek
- Statistical methods in environmental sciences, agriculture and forestry - Karl Moder and Annamaria Castrignano
- Innovative study designs and analysis issues in epidemiology - Maria Grazia Valsecchi
- Robust methods in biostatistics - Alessio Farcomeni
- Recent advances in health impact evaluation - Annibale Biggeri
- Recent developments to tackle time-dependent covariates in clinical research - Martina Mittlböck
- Adaptive clinical trials with subpopulation selection - Hans-Ulrich Burger, Dominik Heinzmann and Kaspar Rufibach
- Evidence synthesis and the use of co-data - Invited session of the Central European Network, Tim Friede and Leonhard Held
- Recent advances in ROC methodology - Invited session of the Italian-Spanish-ERM Regions, Laura Antolini, Malu Luz Calle and Christos Nakas
